lifestyle living

The dawn of the last three decade saw the rising of a star in the horizon called GIRISH, which has since then made millions of homes shine. GIRISH, using state-of-the-art machinery and incorporating the highest level of technology manufactures a range of products like switches, wires, modulars and MCBs. At GIRISH we recognize and embrace our responsibility to adhere to strong business ethics, to act responsibly towards the environment and support the communities in which we conduct our business. Simply put we are driven by our desire “to do the right thing”. GIRISH has built a reputation for commercial foresight and solid integrity. Tested and supervised by experienced engineers in sophisticated labs, Girish has earned a name for themselves in the Indian market.

Switch to Luxury

Thank you for the interest you have shown in our organisation and its products. It is our pleasure to give you an overview of our beautiful journey of close to three decades. A journey full of sweat, toil, passion and innovation, undertaken with a single aim to delight our customers through our world-class quality products adhering to the highest safety standards.

From our humble beginning in the year 1988, we have come a long way. What started as a small set-up to produce electric switches, has turned into a mega-venture manufacturing an entire line of electrical products and accessories. Our flagship brand GIRISH is today an established name and has a whole bouquet of products which cater to all your needs in the electrical solution space.

As first generation entrepreneurs, we can proudly say that it has been a dream come true for us as well as our team of highly skilled and dedicated employees. Needless to say that while we are pleased with what we have achieved, we will continue to research and innovate and bring to you top-of-the-line products.

Our products are backed by a cutting edge research and development centre located inside our manufacturing premises in Haridwar, India. A team of highly trained professionals constantly innovate and benchmark our products against the best in the world. Their collective experience has helped us roll-out many innovative and high-quality products, in multiple categories to meet all your needs. For us, Research & Development is a continuous process, as we strive to always bring the best in the marketplace.

Research & Innovation

Over the years, GIRISH brand of electrical products and accessories products has become synonymous with quality and innovation. Our entire range of products are manufactured in three state-of-the-art facilities located at Haridwar, in the hill state of Uttarakhand, about 250 kilometers away from the capital of India, New Delhi. The three facilities have the latest material handling equipment and quality control instruments.
